Familiar With:

teta • Anima • MySQL • Protopie

PROJECTS

ACCOMODATION FINDER

Project Name - LiveIn

- The Project is made during my Advance Java summer training using JSP,JDBC and Servlet.
- The platform is made for new comers to find hostels,pg and rooms easily for their successful future lifestyle.
- html,css,js,ajax,jquery and bootstrap were helpful in designing this project.
- Fully functional and well-connected Backend Website, MySQL workbench is used for the flexible working of database.

GOOGLE CHROME EXTENSION

Dad Jokes Generator

- The Project is made using html,css,js and manifest file.
- Just tried to make a different project from others which i implemented it as chrome extension and provides jokes which can be further updated to provide motivational thoughts,shayaris etc just by fetching their apis.

CERTIFICATES

Udemy	Learn Java Programming - by Abdul Bari
